Cautionary Statement

This presentation contains forward-looking statements, which are subject to risk factors associated with semiconductor and intellectual property business. It is believed that the expectations reflected in these statements are reasonable. But they may be affected by a variety of variables, many of which are beyond our control. These variables could cause actual results or trends to differ materially which include, but are not limited to: wafer price fluctuation, actual demand, rapid technology change, delays or failures of customers' tape-outs into wafer production, our ability to negotiate, monitor and enforce agreements for the determination and payment of royalties, any bug or fault in our technology which leads to significant damage to our technology and reputation, actual or potential litigation, semiconductor industry cycle and general economic conditions. Except as required by law, eMemory undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

A vertical image on the left side of the slide. It shows a close-up of a hand placing a coin on top of a stack of several other coins. To the left of this stack, another stack of coins is visible, with a small green plant sprouting from the top. The background is a soft-focus green and yellow.

Royalty Revenue by Wafer Size

12-inch wafer increased 80.9% YoY in Q4

Q4 Royalty Breakdown

- ✓ 12-inch wafers contributed 39% of royalty, increased 1.7% sequentially and 80.9% YoY.
- ✓ 8-inch wafers contributed 61% of royalty, increased 5% sequentially and 21.2% YoY.

Royalty

Wafer Size	Q4 2020			FY 2020	
	% of Q4	Change (QoQ)	Change (YoY)	% of 2020	Change (YoY)
8-Inch	61.0%	5.0%	21.2%	62.3%	18.0%
12-Inch	39.0%	1.7%	80.9%	37.7%	61.4%

Future Outlook

eMemory Embedded Everywhere

eMemory's IP seeks to penetrate across all the applications

Core Tech

✓ Product Applications:

eMemory's IP are already applied into different applications, which includes PMIC, LCD driver, Sensors, RFID, OLED Driver, Connectivity IC, DTV, STB, SSD Controller, Bluetooth, TDDI, MCU, Fingerprint Sensor, Smart Meters, Surveillance, ISP, CIS, DRAM, embedded Flash and FPGA.

✓ Future Target:

AP, GPU, CPU, Flash, IoT, AI, autonomous driving

Security

✓ The Future in Security Chip IP:

The rapid growth in AIoT and 5G drive the demand for hardware security. OTP and PUF are indispensable for root of trust in hardware security.

✓ PUF-based Security Solutions:

To satisfy the market needs, eMemory developed a new series of PUF-based security solution, including PUFrt, PUFiot, PUFse and PUFflash.

Our Perspectives

eMemory continue to create value for the industry and our shareholders

Licensing & Royalty

✓ **Licensing:**

- Licensing revenue will grow due to strong demand for NeoFuse, NeoPUF and MTP related (MTP, emerging memory and AI memory).

✓ **Royalty:**

- 8" royalties will grow due to PMIC content increase in 5G smartphone and demand pick-up for TDDI, automotive and IoT applications.
- 12" royalties will have a strong growth as customers are increasing production for ISP, OLED, DRAM, SSD Controller, Multimedia-related, Networking-related such as Bluetooth, WiFi 6, TWS and others.
- Royalties from 16nm and below have started to kick in.

Our Perspectives

eMemory continue to create value for the industry and our shareholders

✓ For New Business Development:

- NeoFuse in advanced process is adopted for secure key storage. This will be a trend for security requirement.
- Business activities of PUF-based security solutions are in progress in applications of IoT, IIoT, AI, Blockchain, FPGA, DPU, UFS, and automotives.
- PUFrt has been adopted by American customers.
- Partnership with ARM and RISC-V will extend our PUF-based security platform.

✓ For New IP Technology Development:

- Demonstrated 6nm silicon results successfully.
- 5nm plus (N5P) has been taped in Q4 and completion of silicon verification expected in 2021.
- Announced crypto processor, PUFiot, & joint-partnership with UMC on PUFflash.
- Develop PUF-based solution to be implemented in HSM.

**New
Business &
IP Technology
Development**

Applications of PUF-based Security Solutions in DPU

Why is DPU Required in Data Centers?

Conventional Data Center vs. DPU-powered Data Center

Conventional Data Center

CPU suffers lack of performance due to increased computation loading in APP, Network, and Storage.

DPU-powered Data Center

Offloading tasks to the DPU eases the workload of CPU and improves overall performance.

Why Does DPU Need Security Solutions?

Optimal Performance

Security can be carried out by specialized DPU, while CPU focus on applications.

Isolated Attack Surface

Each DPU forms its own Secure Enclave, which lowers the chance of a system breakdown.

Enhanced Security Level

An ideal DPU should safeguard the data under any circumstances, whether at-rest or in-transit.

Why is PUF-based HW Security the Solution?

Inborn and Genuine HW Root-of-Trust

- A firm foundation of security management
- Unique, Random, Robust, and tamper-proof

Best-in-class Key Generation

- Keys with high entropy generated on-demand
- PUF-entangled Untraceable key storage

Comprehensive Security Functions

- Ensure Confidentiality, Integrity, & Authenticity
- Accelerated crypto within a secure boundary

Q&A

Appendix

Company Overview

eMemory is the global leader of embedded non-volatile memory IP

Revenue Trend

(Unit: NT\$ 1,000)

Founded In 2000

Based in Hsinchu, Taiwan.
IPO in 2011. Over 33M wafers
shipped.

800+ Patents Issued

229 pending patents. 288
employees with 67% R&D
personnel.

Best IP Partner With TSMC

TSMC Best IP Partner Award
since 2010.

Quarterly Revenue Pattern

eMemory's quarterly revenue pattern

- ✓ 1st month: Receive **License Fees** of the month and **Royalty** from most foundries on previous quarter's wafer shipments.
- ✓ 2nd month: Receive **License Fees** of the month and **Royalty** from other foundries.
- ✓ 3rd month: **License Fees** Only.

(Unit: NT\$ 1,000)

Worldwide Customers

Our IP solutions are adopted by leading foundries, IDMs and fabless worldwide

Country	Foundry	IDM	Fabless
Taiwan	4	1	304
China	8	0	827
Korea	4	0	89
Japan	4	6	68
North America	1	2	303
Europe	2	1	182
Others	1	0	73

Business Model

Recurring royalty is the backbone of our business

- ✓ 70-75% revenue are from royalty based on wafer production
- ✓ More adoption = more volume shipment
- ✓ More advanced node wafers = higher ASP per wafer

Technology Licenses

Cumulative technology licenses

Number of Licenses

Year	2016	2017	2018	2019	2020
License	43	20	26	18	28

Note: Terms (including number of process platforms and licensing fees) for each technology license are set contractually. Payments are made according to set milestones, and there are no particular seasonal factors involved.

New Technology Under Development

Products in different process nodes

- ✓ New technologies are being developed for 99 platforms by Q4 2020.
- ✓ 4 licensing contracts were signed, 3 for NeoFuse and 1 for NeoMTP.

Technology	5/6nm	7/10nm	12/16nm	22/28nm	40nm	55/65nm	80/90nm	0.11~ 0.13um	0.15~ 0.18um	>0.25um
