# **Cautionary Statement**

This presentation contains forward-looking statements, which are subject to risk factors associated with semiconductor and intellectual property business. It is believed that the expectations reflected in these statements are reasonable. But they may be affected by a variety of variables, many of which are beyond our control. These variables could cause actual results or trends to differ materially which include, but are not limited to: wafer price fluctuation, actual demand, rapid technology change, delays or failures of customers' tape-outs into wafer production, our ability to negotiate, monitor and enforce agreements for the determination and payment of royalties, any bug or fault in our technology which leads to significant damage to our technology and reputation, actual or potential litigation, semiconductor industry cycle and general economic conditions. Except as required by law, eMemory undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

# Future Outlook

# Future Outlook

### Licensing & Royalty:

- Licensing:
  - Due to strong demand from foundries and chip design customers for all of our technologies, the growth momentum of licensing revenue will continue to increase.
- Royalties:
  - Our royalty will grow, driven by 1500 new tape-outs from the past three years in the pipeline entering mass production (i.e. 6nm DTV, 7nm ADAS, 12 nm SSD and ISP, as well as 22/28nm networking, switch, and smart image processor...)

ememc

# Future Outlook

#### New IP Technology & Business Development:

- Specialty processes (HV, HK, BCD, embedded flash, and emerging memory):
  - 1. NeoFuse is developing towards FinFET in HV process for OLED DDI applications.
  - 2. RRAM is expanding into more processes.
  - 3. NeoFlash continues progressing in specialty processes for Automotive PMIC and MCU-related products.
- Advanced processes:
  - 1. NeoFuse has successfully qualified for the N5 automotive process with customer design in.
  - 2. PUFrt collaboration with CPU vendors in 3nm is progressing successfully.

ememo

# Future Outlook

### **Business Collaboration Platforms:**

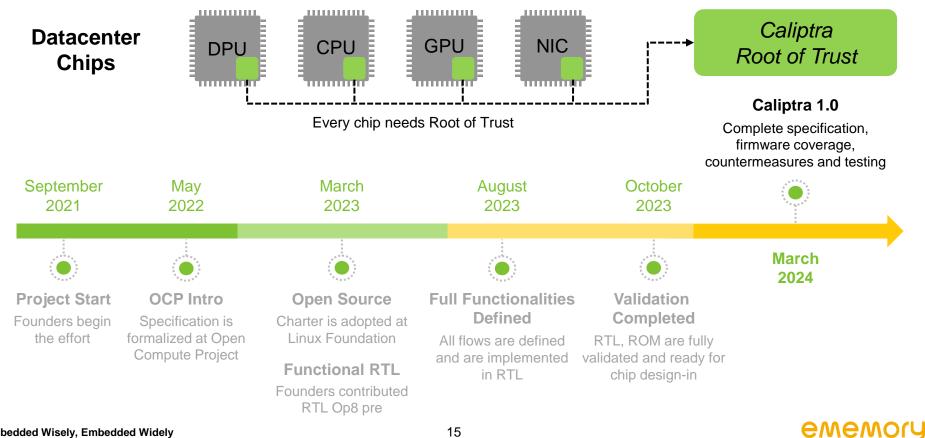

- Non-volatile Memory (NVM) and PUF-based Technologies
  - We are expanding cooperation with all new foundries to license our technologies besides existing foundries.
- Security IPs:
  - We have completed the agreement with the largest CPU IP company to integrate our security solution into the CPU architecture.

# Caliptra : Building a Silicon Root of Trust in Datacenters and Every Chip

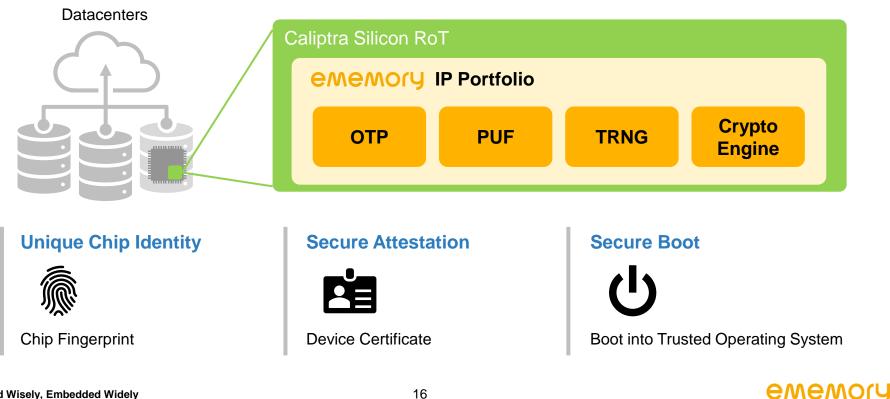

### Why is **Caliptra** so Important?

## What is the Important Role of **eMemory** in **Caliptra**?

eMemory's root of trust IP is ready to meet Caliptra's requirements. 

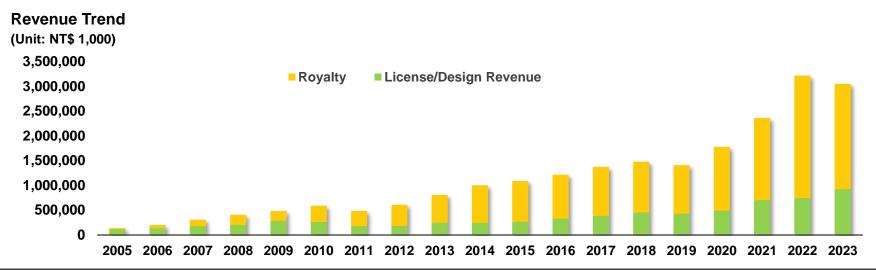

# Appendix

# **Company Overview**

eMemory is the global leader of embedded non-volatile memory IP 

### Founded In 2000

Based in Hsinchu, Taiwan. IPO in 2011. Over 58M wafers shipped.

### 1200 +Patents Issued

193 pending patents. 360 employees with 67% R&D personnel.

### t IP Partner With TSMC

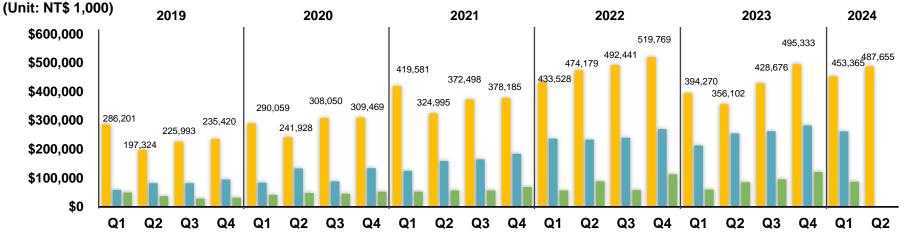

**TSMC Best IP Partner Award** since 2010.

# Quarterly Revenue Pattern

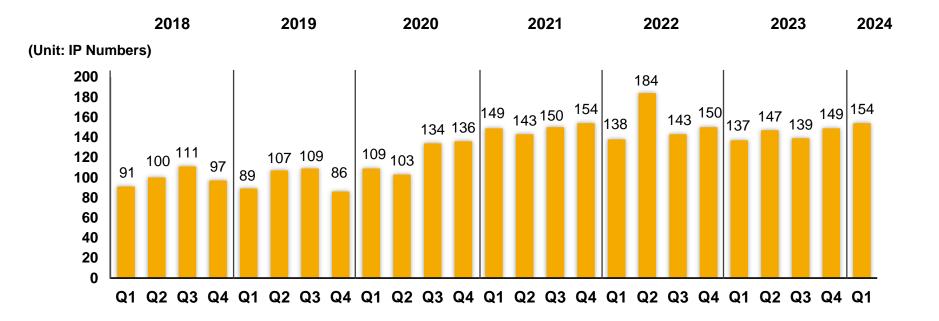

- 1<sup>st</sup> month: Receive License Fees of the month and Royalty from most foundries on previous quarter's wafer shipments.
- 2<sup>nd</sup> month: Receive License Fees of the month and Royalty from other foundries.
- 3<sup>rd</sup> month: License Fees Only.
