Cautionary Statement

This presentation contains forward-looking statements, which are subject to risk factors associated with semiconductor and intellectual property business. It is believed that the expectations reflected in these statements are reasonable. But they may be affected by a variety of variables, many of which are beyond our control. These variables could cause actual results or trends to differ materially which include, but are not limited to: wafer price fluctuation, actual demand, rapid technology change, delays or failures of customers' tape-outs into wafer production, our ability to negotiate, monitor and enforce agreements for the determination and payment of royalties, any bug or fault in our technology which leads to significant damage to our technology and reputation, actual or potential litigation, semiconductor industry cycle and general economic conditions. Except as required by law, eMemory undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

Future Outlook

Future Outlook

Licensing & Royalty:

■ Licensing:

- We anticipate that licensing revenue will continue its growing momentum due to very strong demand from both foundries and fabless customers for our IPs.

■ Royalties:

- We expect royalty revenue to continue its growth trend as the accumulated tape outs in the pipeline that are moving into production. Particularly, we have started receiving PUF royalties which will accelerate our royalties growth momentum in the future.

Future Outlook

New IP Technology & Business Development:

■ New IP Technologies:

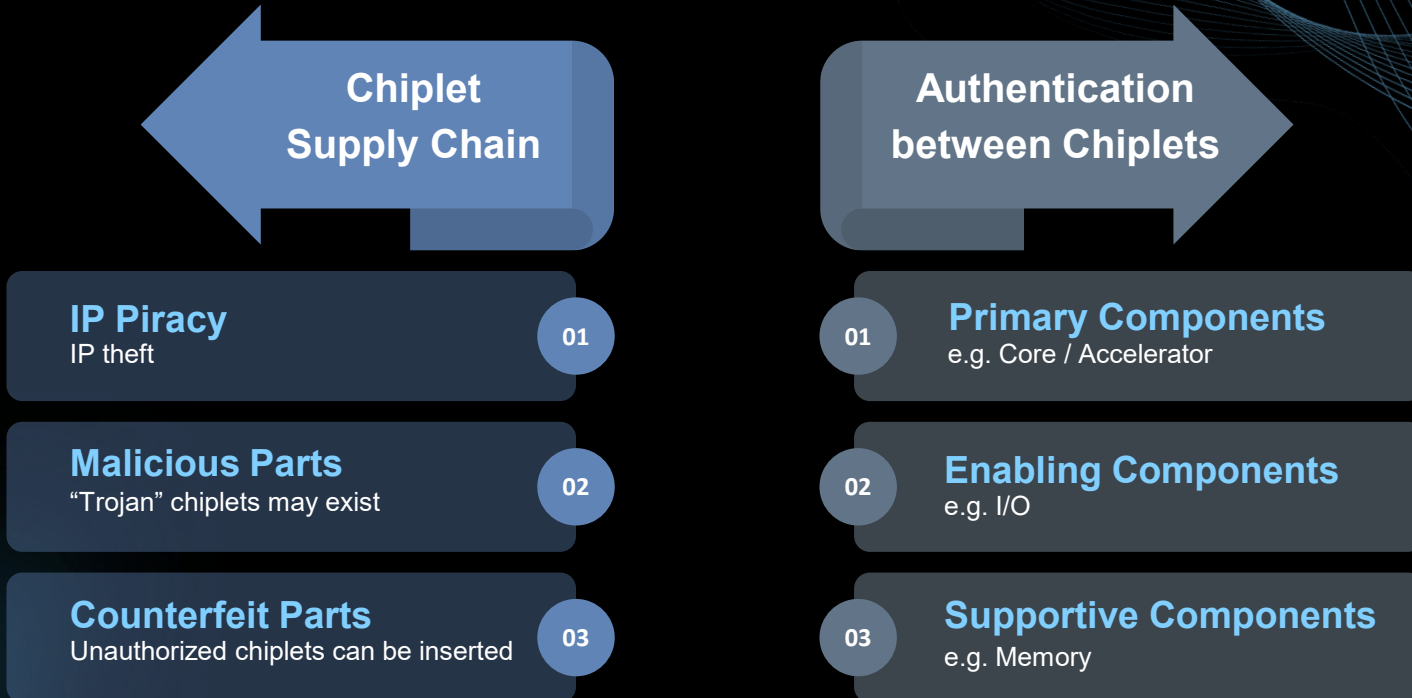

- Our new Post-Quantum Cryptography (PQC) has been fully developed and certified under NIST's CAVP program, covering the published FIPS 203 (ML-KEM) and FIPS 204 (ML-DSA) standards. This marks the official launch of our full-stack PUF_{PQC} architecture.
- On TSMC's N3P process, our NeoFuse OTP, NeoPUF, and PUF-based Root of Trust have been qualified, enabling secure PUF-based solutions for advanced AI, HPC chips, and chiplet designs. We're also advancing development on N3C and N3A processes to serve value-tier products and automotive applications.
- In partnership with leading foundries, we are advancing the development of 2nm technologies.

Company Overview

- eMemory is the global leader of embedded non-volatile memory IP

Revenue Trend

(Unit: NT\$ 1,000)

**Founded
In 2000**

Based in Hsinchu, Taiwan.
IPO in 2011. Over 69M wafers
shipped.

**1300+
Patents Issued**

214 pending patents. 360
employees with 69% R&D
personnel.

**Best IP Partner
With TSMC**

TSMC Best IP Partner Award
since 2010.

Quarterly Revenue Pattern

- 1st month: Receive **License Fees** of the month and **Royalty** from most foundries on previous quarter's wafer shipments.
- 2nd month: Receive **License Fees** of the month and **Royalty** from other foundries.
- 3rd month: **License Fees** Only.

(Unit: NT\$ 1,000)

Quarterly Number of New Tape-outs

Worldwide Customers

- Our IP solutions are adopted by leading foundries, IDMs and fabless worldwide

Country	Foundry	IDM	Fabless
Taiwan	4	1	350
China	12	0	1361
Korea	4	0	103
Japan	1	9	88
North America	2	2	368
Europe	2	2	237
Others	1	0	127

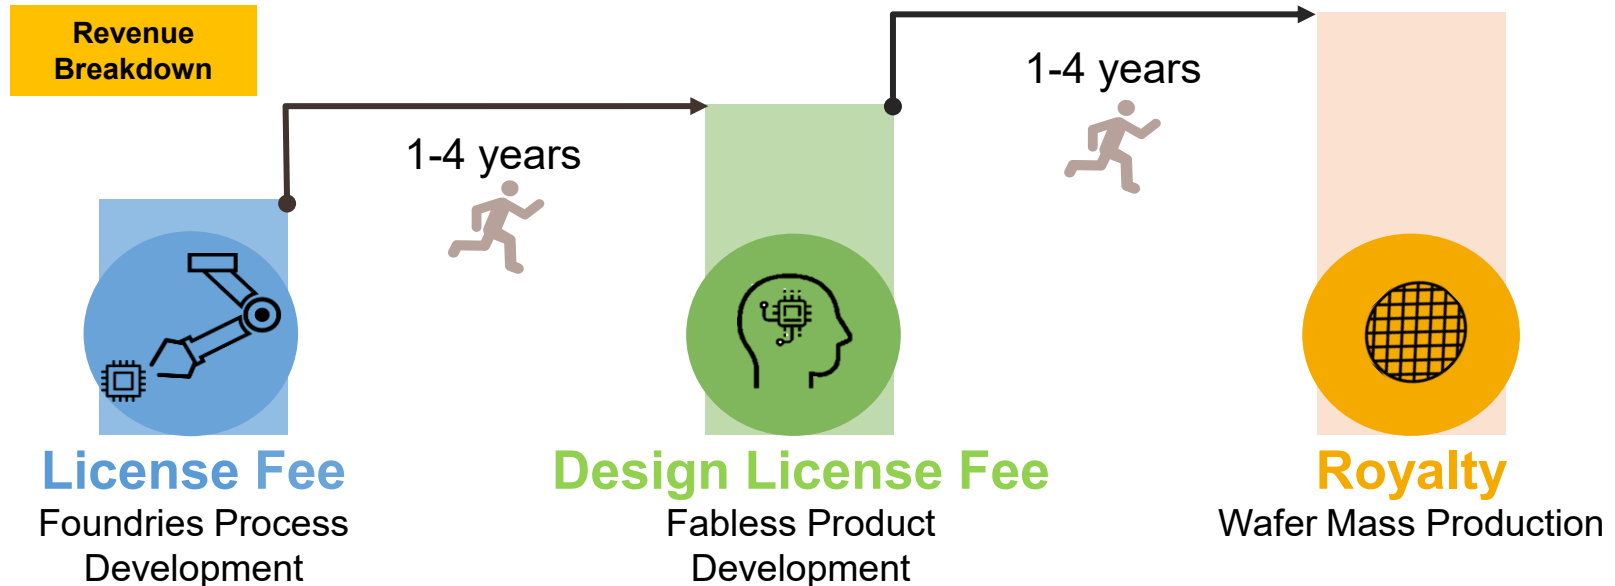

Business Model

- Recurring royalty is the backbone of our business

- 70-75% revenue are from royalty based on wafer production
- More adoption = more volume shipment
- More advanced node wafers = higher ASP per wafer
